

THOR HAN

Hope / Reptilian manipulation /

Thor Han: Do not lose hope, that things will be alright. We have told you that there will be a period of confusion and this is just starting, do not lose hope and focus on the future you manifest, this is my message. We are doing our best to support you and help everything to be alright, and the obstacles out of the way, we are working hard, we are supporting you. Believe in yourselves, do not let confusion reach out to you because this is what is at the moment for you, and you will see, you will be well, this is what I can say, not more.

Q: *Several people are seeing reptilians coming to them to tell them that there are very few draconians that are bad. I bring it up because of a concern that some people are being manipulated to believe.*

Thor Han: This is very important and this is happening more and more, they are trying everything because they are losing, they are being cast away, and they are leaving, so they are trying everything they can to hook at Terrans, and souls as well who come from other worlds. They try to manipulate and deceive, they are very well skilled in shapeshifting, and they are very well skilled at deceiving. This is the same attitude they have, hiding who they are, hiding their identity and their true nature. This is very important, you are absolutely right, and you must be careful, any reptilian who is saying that they are all in fact very good and very nice and few of them are malevolent, this is manipulation. They try everything they can, they will tell you lies, they will tell you that the federation is bad, or they will tell you that ships are going to come and land, this is manipulation, do not listen anything that is said by a reptilian. There are many different species of reptilians on all many worlds in this galaxy, but concerning Earth, these ones are not your friends, this is what I can say.

Q: *Spiritual people are very trusting people, they see somebody that comes in and shows love, they trust it.*

Thor Han: They know the place in your brain they can activate. Also, stop anything that ties you down into lower vibration and makes you vulnerable to lower entities; substances altering your vibrations, tobacco doesn't but drugs that alter the mind, they do. Pleasing yourselves physically generates very attractive energy frequencies which are on the same base as the lower entities who can hook at you, and they want more and they feed from you, they want you to do it regularly and more and more often because they will feed off your energy. Here come addictions. Sexual energies must be shared with love energy, when it is shared with love it becomes something absolutely nourishing, high vibrational and beautiful. Done on its own it is very attractive to bad entities, it is a choice, this is dangerous.
